Located in Estherville, Iowa, AERO Race Wheels, Inc. is one of the premier steel racing wheel manufacturers and suppliers in the U.S. to date. Established in 1995, AERO Race Wheels was created to provide higher quality wheels designed specifically to endure the tough requirements and conditions of the racing industry. Most importantly, the wheels needed to be manufactured and marketed while maintaining an affordable price structure. Our wheels can be seen accessorizing the locals at the dirt and asphalt tracks across the nation, as well as a majority of the teams on the NASCAR Sprint Cup circuit. In fact, since November 2nd of 1997, AERO’s NASCAR Wheel has won more Cup, Nationwide and Truck races than all other brands combined. Following the company motto “Surpassing the Standard,” AERO’s manufacturing team, along with the in house design, engineering and sales teams, pride themselves on building a product made for racers, by racers.

EATON HYDRAULICS, INC.

Company Overview

Eaton is a diversified power management company providing energy-efficient solutions that help our customers effectively manage electrical, hydraulic and mechanical power. The company is a global technology leader in electrical products, systems and services for power quality, distribution and control, power transmission, lighting and wiring products; hydraulics components, systems and services for industrial and mobile equipment; aerospace fuel, hydraulics and pneumatic systems for commercial and military use; and truck and automotive drivetrain and powertrain systems for performance, fuel economy and safety.

Once known as a vehicle components supplier, Eaton has diversified to include a broader industrial and commercial focus. Today, Eaton’s businesses comprise five distinct segments: Electrical, Hydraulics, Aerospace, Truck and Automotive.

The Eaton Spencer plant is part of Power Motion and Controls of the Hydraulics Division. The plant manufactures and hydraulic pumps and motors in various configurations to support customer needs. Built on 66 acres and opened in March of 1974, the Spencer facility has grown to its present 334,000 square feet with a workforce of 350 employees working three shifts per day.
